REPORT.

To the Stockholders of the

Union Pacific Railway Company:

Your Directors submit the following report of the operations of the Company, for the year ending December 31, 1881:

LENGTH OF RAILROAD.

UNION DIVISION:

Council Bluffs to the Junction with the Central Pacific Railroad, - - - 1,042.4 miles.

KANSAS DIVISION:

Kansas City to Denver, and Leavenworth to
Lawrence, - - - 672.5 miles.

CHEYENNE DIVISION:

Denver to Cheyenne, - - - 106 miles.

Total, - - - - 1,820.9 miles.

Being the same as at the date of the last Annual Report.

EARNINGS AND EXPENSES.

*The Gross Earnings of the Company for		
the year were,	\$24,258,817	10
Operating Expenses (including taxes),	12,480,342	71
Surplus Earnings,	\$ 11,778,474	39
Interest and Dividends collected on Invest- ment Securities excluding Interest col- lected on Bonds deposited as Security for the Collateral Trust Bonds,	1,332,678	31
Total Surplus Earnings,	\$13,111,152	70
PAYMENTS.	•	
Interest on Bonds (excluding Collateral		
Trust,)	\$4,819,128	28
Discount, Interest and Exchange,	95,542	
Stock Dividends, 7 per cent.,	4,076,134	
Sinking Funds (excluding Collateral Trust), Amount due the United States on business of		
the year,	1,653,358	81
Premiums paid on Bonds redeemed and losses on Securities sold,	21,653	o8 ——
Total Payments,	\$10,972,817	25
Surplus after deducting payments,		
FUNDED DEBT.		
The total Funded Debt of the Company is Less Amount held by Trustees of Consoli-		
dated Mortgage,	10,784,501	3 <i>7</i>
Balance,	\$82,118,133	75

^{*} The gross earnings of the Union Pacific system, together with its Branch lines, for the year 1881 were but little short of \$30,000,000.

INVESTMENT SECURITIES.

The Bonds and Stock of other Companies owned by your Company are as follows:

Bonds, par value, Stocks, "	-	-	-	-	-	-	-	-	- \$23,063,430 40 28,711,500 00
Total,	_		_		_		_	-	\$51,774,930 40

The total length of the Union Pacific Railway and branch lines is forty-two hundred and seventy miles, on which the outstanding amount of stocks and bonds not owned by this Company, are as follows:

Stock, about fifteen thousand dollars per mile; bonds, about twenty-two thousand dollars per mile.

1881 COMPARED WITH 1880.

1881,	Bonds at Par Value. \$23,063,430 18,327,264	Stock at Par Value. \$28,711,500 20,483,811
Increase,	\$4,736,166	\$8,227,689
Railway Supplies on hand De Railway Supplies on hand De Increase December 3	c. 31, 1880, -	\$3,164,476 25 1,880,297 55 \$1,284,178 70
Expenditures for Equipment i	n 1881,	\$1,001,481 01
Expended for Construction in	1881,	712,427 23
Reduction of Funded Debt, 1	881,	\$1,126,000
Expenditures for Steel Rails,	1881,	- \$1,700,425

During the year the Capital Stock of the Company was increased by the sum of \$10,106,200.

It was stated at the time the increase was authorized that the money paid in would be required in needed improvements and construction of branch lines for the benefit of the Company. The above statements indicate in part the manner in which the money has been expended, and a comparison of the present Annual Report with that of 1880 exhibits the changes in the various securities belonging to the Company. Many of the securities are already sought for as a favorite investment, and can be readily disposed of, should it be considered for the interest of the Company to do so.

The Operating Expenses in 1881 (including		
taxes) were	\$12,480,342	7 I
The Operating Expenses in 1880 (including		
taxes) were	10,545,119	52
Increase in 1881,	\$1,935,223	19
Percentage of Operating Expenses (includ-		
ing taxes) to Gross Earnings in 1881		
was	51.45	
Percentage of Operating Expenses (includ-		
ing taxes) to Gross Earnings in 1880	5	
was	46.96	
Increase in 1881,	4.49 per ce	nt.

The increased rate of Operating Expenses in 1881 was caused by the additional expenditure, over the previous year, of \$590,000 for steel rails laid in the track in place of iron rails; the additional expenditure of \$247,000 for repairs to track, and the additional expenditure of \$394,000 for repairs to rolling stock. These expenditures, amounting in the aggregate to \$1,241,000, will ensure greater efficiency in

operating the Road, and a very material reduction in the expenses of its working and maintenance.

mpant

Orize:

iefit a

the: lac t of.

nge.

V SCC

osei pani Deducting this amount from the operating Expenses of 1881, for the purpose of comparison with the Operating Expenses of the preceding year, it is seen that the percentage was 1881 per cent. less in 1881 than in 1880.

PASSENGER EARNINGS.

The Earnings from Passengers for 1881 were \$5,131,571 39 The Earnings from Passengers for 1880 were 5,405,125 32

Decrease in 1881, - - - \$273,553 93

FREIGHT EARNINGS.

The Earnings from Freight in 1881 were - \$17,063,127 20 The Earnings from Freight in 1880 were - 15,218,507 49

Increase in 1881, - - - \$1,844,619 71

This decrease, amounting to about five and one-half per cent. of the Gross Earnings from Passengers, was caused mainly by a reduction of 20 per cent. in the local rates, made in pursuance of the settled policy of the Company to foster the development of the country along the line of its Railway. Although this abatement of rates has resulted in the temporary diminution of earnings, yet no doubt is entertained that it will eventually promote the interests of the Company.

The increase of Earnings from Freight in 1881 were due to several causes. First in importance was the general increase of local business throughout the line of the Com-

The Estimated Earnings of the Consolidated Road and Branches for January and February compare as follows:

1882,	-	-	-	-	-	\$3,720,951 00
1881,	•		•	-	-	2,778,600 00
:	Increase,	-	-	-	-	- \$942,351 00

pany's Railroad, and next in importance, as well as in amount, was the increase of Freight from and to the connecting railroads controlled by this Company. The articles of Freight showing the largest increase over the preceding year were Coal, Live Stock, Coke, Lumber, Iron, Bullion, Hay, Groceries, Oil, Dry Goods, Wool, Salt, Stone and Ore. This description of Freight indicates unmistakably the development of the country tributary to the Road.

The tonnage of Freight over your Road to and from the Pacific Coast also showed an increase over the year preceding, but the low rates at which it was carried rendered it the least profitable of any Freight transported by the Company.

Of the Total Net Earnings of this Company from the transportation of Freight during the past year, the Pacific Coast Freight contributed but seven and one-half per cent.

COAL.

The production and cost of coal mined by the Company compare as follows:

In 1881, !		Cost. \$814,613 547,325	-	Av. Cost. \$1 39 1 23
Increase, 1	142,364	\$267,287	 90	\$0 16

The cost of additional machinery and of improvements of all kinds for increasing the capacity of existing mines and for the opening of new mines is included in the above. During the year 1881 there were expended for these purposes:

At Carbon Mines, -		-		-		-		-		- \$63,793 5	2
At Rock Spring Mines,	-		-		-		-		-	17,881 0	7
At Almy Mines,		-		-	•	-		-		- 69,926 I	8
At Grass Creek Mines,	-		-		-		-		-	23,054 8	4
											-
Making the total		-		_		-		_		\$ 1 <i>74</i> ,655 6	I

Although the quantity of coal mined by the Company has increased for some years at the rate of 25 per cent per year, yet the demand for coal on the line of the railroad has increased in a greater proportion. The Improvements made the past year have increased the capacity of the mines to double the output of the year 1831, and it is now expected that the additional Railway equipments, under contract to be delivered early this season, will enable the Company to meet promptly the demand for coal during this year.

The Company has an interest in fully supplying this demand, not only on account of the direct profit realized from the sale of coal, but also from the development of business that results from an abundant supply of cheap fuel of an excellent quality for domestic and manufacturing purposes.

The sales of coal to other Railway Companies and to private consumers compare as follows:

	Tons.	Amt. Sales.
In 1881,	- 193,031	\$1,098,863 83.
In 1880,	137,119	743,087 05
Increase in 1881, -	- 55,912	\$355,776 78

LAND SALES.

During the past year there were 1,532 purchasers of lands of the Company.

The average price paid was \$4.60 per acre, and the net proceeds realized from the sales amounted to \$669,926.25.

Sales have been made of lands in Colorado to parties who are obligated to construct irrigation canals, the cost of which will exceed half a million dollars. The work on these canals is progressing steadily, and upon their completion large areas of the arid lands of the Company will become saleable.

LAND GRANT FUND, UNION DIVISION.

The whole issue of Land Grant Bonds amounted to \$10,400,000, of which \$5,016,000 have been cancelled.

The land contracts, with accrued and accruing interest and cash on hand, amount to a sum largely in excess of the outstanding Bonds.

LARAMIE ROLLING MILL.

The Company's mill at Laramie turned out 10,613 tons of re-rolled rails and 6,120,648 pounds of bar iron, nuts, spikes and splices, all of which were made from worn-out iron rails taken from the track. The re-rolled rails were laid in the tracks of branch lines, and the rail fastenings were used on those lines and in the track of the main line.

RENEWALS OF TRACK.

During the past year 35,142 Tons of Steel Rails, 1,690 Tons of Iron Rails, and 716,355 Oak, Cedar and Pine Ties have been laid in the track.

CONDITION OF THE ROAD.

The large expenditure made last year of \$3,620,000 for steel rails, new ties, repairs of track and bridges, being three-quarters of a million dollars in excess of the expenditures for like purposes the previous year, has brought the track and road-bed and bridges into such thoroughly good condition that a material reduction in future annual repairs are certain to result. In the main line between Council Bluffs and Ogden there remain but forty miles of iron rails, and these will be replaced with steel rails early this season.

To prevent a recurrence of the detention of trains at periods of exceptional high water in the Platte valley, similar to the flood in the Spring of 1881, the embankments subject to overflow have been raised and widened, and additional openings provided through them for the passage of flood water.

The locomotive water service has been greatly improved during the past year by conducting pure water to the line of Railroad in iron pipes from distant springs and by drilling Artesian Wells and by the erection of additional tanks. The surface water of the country throughout the Mountain Division of the Road being alkaline to a greater or less de-

gree, and insufficient in quantity, the necessity of a larger and purer supply to meet the increasing demands for locomotive use became imperative. At Fillmore, Table Rock and Rawlins, Artesian Wells have been bored to depths varying from 380 feet to 1,500 feet, all of which furnished water of excellent quality and in abundant quantity. The well at Rawlins overflows and yields 250,000 gallons in 24 hours, The success which has attended the boring of Artesian Wells has a very important bearing on the value of the arid lands of the Company, which only need water to become highly productive.

The Stations, Machine Shops and Buildings of all kinds pertaining to the road have been maintained in good repair, and numerous additions thereto have been made to provide for increased business. The Rolling Stock has been increased by the addition of 31 new Locomotives, 875 Box Cars, 100 Flat Cars, and 225 Stock Cars, 2 Baggage Cars, 2 Express and 17 Way Cars. The addition of this new Rolling Stock, together with the large expenditure made last year for repairs to Locomotives and Cars has brought the equipment to a highly efficient condition.

During last year 42½ miles of side track were laid, and 27 miles the year previous, but additional facilities are required to prevent the delay of freight, and especially of cattle trains. It will require about 20 miles of side track to be laid this year to afford proper dispatch to the freight business of the Road.

CONNECTING RAILROADS.

Connecting railroads operated in the interest of your company were extended during 1881 as follows:

Utah & Northern Railroad,	65	6-10	miles.
Omaha, Niobrara & Black Hills Railroad,	9	3-10	44
Echo & Park City,	5		"

,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	

The extensions of connecting lines made during the past year have secured business to your Railroad, from rich mineral districts, which will increase rapidly under the stimulus of railway, instead of wagon rates for transportation. The Utah and Northern Railroad has reached the heart of the mineral region of Montana, and now commands, without competition, the transportation of supplies thereto, and of the products of that rapidly developing region.

The Oregon Short Line Railway, on which 64 miles of track were laid on the 1st of January, 1882, has, in that distance, penetrated a coal field equal in the number and thickness of veins, and quality of coal, to any field that has been discovered west of the Missouri River. In addition, 96 miles of this line are graded ready for the track, and from the present advanced state of the work it may be assumed with confidence that the line will be opened for business this year for a distance of four hundred miles from the Junction with the Union Pacific Railway. This length of line will develop, besides the coal field referred to, the iron ore deposits and the agricultural and timber lands of Bear River Valley for a distance of 100 miles, and will give easy access to the mining districts of Idaho that occupy the valley of Wood River and the adjacent mountains.

Recent developments of this region give assurance of extraordinary abundance and richness of mineral deposits, and confirm the belief that with railway facilities the experience of Colorado will be duplicated in Idaho.

The extension of the Denver, South Park and Pacific Railroad to Gunnison and the coal fields was delayed by the severity of the season in the mountains, but the line is now ready for the track, which will be laid as early in the Spring as may be found practicable. This extension will develop not only several mineral districts of growing importance on the line, but also a coal field at the terminus with workable veins of both anthracite and coking coal. The transportation of this fuel to Leadville, and to the smelting works, on and near the line of the Denver, South Park and Pacific Railroad, and to Utah via Denver and Cheyenne, will furnish a large amount of business at very profitable rates.

Several short branch lines from the Denver, South Park and Pacific Railroad, and from the Colorado Central, have been extended into the mountains in the direction of producing mineral districts. These lines stimulate the production of minerals by diminishing rates of transportation on the product of mines and of supplies thereto, and increase the volume of freight which passes for five hundred miles over the line of your railway.

Within the past year the Julesburg Branch—151 miles in length—has been completed, and it already has a large traffic. As an outlet and inlet for Colorado business this line, in connection with the Union Pacific, presents advantages for economy of transportation that can never be surpassed by rival routes. The line occupies the valley of the Platte for its entire length, the average fall of which is but nine feet per mile; and, in connection with the Union Pacific, it presents a railway route to Denver with maximum grades of but sixteen feet per mile.

RESUMÉ.

The general policy of fostering the local business of the road, while aiding in the construction of branch lines, to add to the general traffic of the Company, has been adhered to, and has produced valuable results. The reduction of local passenger rates has stimulated inter-communication and has attracted settlers to the line of the road, who receive in this act of the Company an assurance that further reductions will be made at a proper time. The branch lines controlled by the company, although they are in an unfinished condition and without adequate equipment, are not only self-sustaining, but they have contributed a large revenue directly to the Company. The results already accomplished give the strongest assurance that the protection of your interests required their construction and their maintenance under your control. With the development of the country that they penetrate, these lines will become still greater sources of profit from the business passing over them, and to the Union Pacific Line they will contribute a vast amount of traffic that might become diverted to rival routes.

SIDNEY DILLON,

President.

Comparative Statement of Earnings and Expenses.

Earnings.	YEAR 1880.	YEAR 1881.
Passengers—Cash	\$5,171,114 97 234,010 35 13,406,910 18 469,025 04 1,342,572 27 719,349 84 681,818 02 430,333 91	\$4,922,711 28 208,860 11 15,075,515 28 484,013 14 1,503,598 78 721,312 34 696,184 12 646,622 05
Total Earnings	\$22,455,134 58	\$24,258,817 10
Expense ratio, per cent.	46.96	51.45
Expenses.	YEAR 1880.	YEAR 1881.
Conducting Transportation Motive Power Maintenance of Cars Maintenance of Way Renewal of Rails General Expenses Taxes	\$2,132,692 47 3,583,453 72 841,417 08 1,964,772 72 1,109,676 57 473,198 98 439,907 98	\$2,482,587 56 4,073,043 19 1,112,862 52 2,179,071 36 1,700,425 96 538,340 63 394,011 49
Total Expenses	10,545,119 52	12,480,342 71 11,778,474 39

The decrease in Surplus Earnings is accounted for by the large amount expended for new rails, this amount being \$590,749.39 in excess of 1880. The renewal of rails for 1880 and 1881 completed the relaying of the Union Division with steel rails within forty miles. The amount required for the whole road for 1882 being only \$550,000. This will materially reduce the expenses of operating the road hereafter.
